---

*Aspiring front-end developer with over 2 years of experience, solid foundation in React, TypeScript, and TailwindCSS, seeking an entry-level position to leverage my project experience and coding skills to contribute successfully to dynamic development teams.*

## EXPERIENCE

---

### MultiStepForm [GitHub](#) [Deploy](#)

Front End Developer

June 2024

Optimized the user experience by designing and implementing a dynamic multi-step form using React and TailwindCSS, allowing users to complete complex forms in simple steps.

- Implemented form validation and step navigation using React hooks and state management with Redux.
- Utilized TailwindCSS for a modern and responsive UI design.
- Developed advanced state logic to manage user inputs, improving efficiency by 20%.

### Calculator [GitHub](#) [Deploy](#)

Front End Developer

January 2024

Developed and optimized an intuitive calculator using React and TailwindCSS, facilitating precise and quick calculations for users.

- Designed and developed a responsive user interface using TailwindCSS, enhancing mobile device accessibility.
- Improved event handling and state management with React hooks, reducing user errors.

### Technological E-Commerce [GitHub](#) [Deploy](#)

Front End Developer

December 2023

Developed a technological E-Commerce platform for selling products, enhancing user interaction and content management.

- Implemented routing with React Router, facilitating smooth navigation between pages.
- Designed and developed stylized components with TailwindCSS, improving visual appearance and user experience.

## EDUCATION

---

### UNIVERSITY OF HELSINKI

Full Stack Developer
